

PROJECT DEVELOPMENT PHASE

SPRINT 3

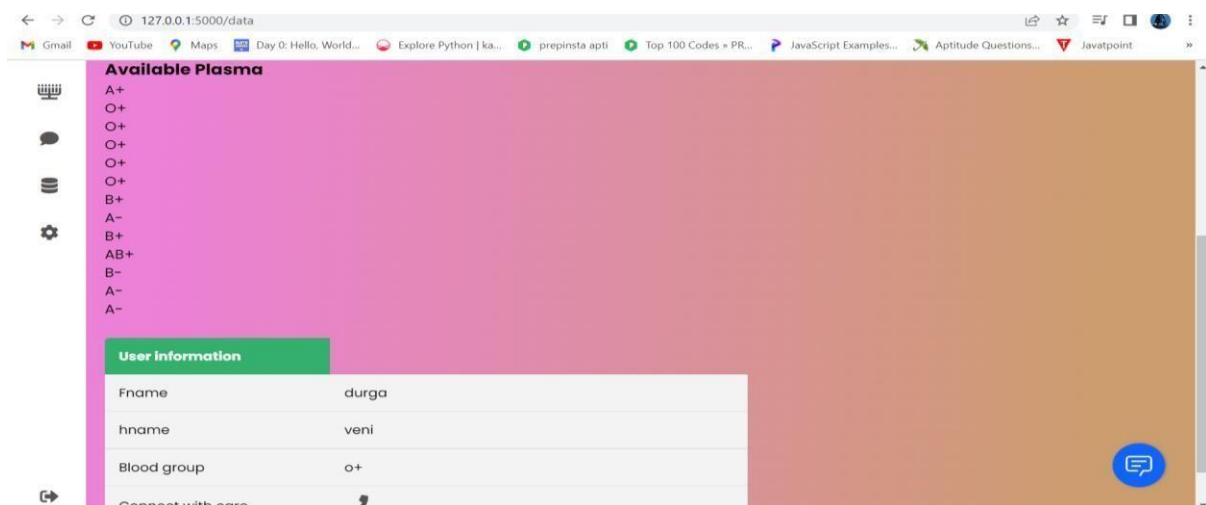

TEAM ID	PNT2022TMID45457
PROJECT NAME	PLASMA DONOR APPLICATION

DASHBOARD:

1. Before retrieval of records(blood groups) from IBM cloud database

2. After retrieval of available plasma from IBM cloud database

3. Dashboard along with Watson chatbot Application

The screenshot shows a web browser at the URL 127.0.0.1:5000/data. The browser's address bar and tabs are visible at the top. The dashboard on the left has a pink background and a sidebar with icons for a terminal, chat, database, and settings. The main content area is titled "Available Plasma" and lists blood types: A+, O+, O+, O+, O+, O+, B+, A-, B+, AB+, B-, A-, and A-. Below this list is a green "User information" header, followed by a table with the following data:

User information	
Fname	durga
hname	veni
Blood group	o+
Connect with care	

On the right, a "hospital bot" chat window is open. It displays a conversation where the user asks "Hi! How can I help u?" and the bot responds with "Blood donors". The user then asks "I need to donate blood how can I contact" and the bot replies "You could contact through social media". There is a "Website" dropdown menu and a "WebSite" button with a question mark icon. The chat window also shows a "type something..." input field and a "Built with IBM Watson®" footer.

This screenshot shows the same web dashboard and chatbot interface. The "Available Plasma" list is the same. The "User information" table is also the same. The "hospital bot" chat window now shows a different part of the conversation. The user has typed "yes" and the bot has responded with "Do you ensure donors health before collecting blood?". The user then asks "yes! we would ensure's the health of patient" and the bot replies "What happen when you don't have the required plasma". The user then asks "we would fetch the donors as soon as possible" and the bot replies "If I faced a issue in fetching details where can I get support". The user then asks "hello! here HELP DESK is there to help you" and the bot replies "hello! here HELP DESK is there to help you". The chat window also shows a "type something..." input field and a "Built with IBM Watson®" footer.
